

Job Interview

Name: Darius Buhai

Group: 234

Interviewer: Good morning Darius and thank you for applying to us, we will start the interview by learning a bit about you. So first of all, can you tell me a bit more about yourself, and what made you enjoy coding?

Applicant: Good morning. Yes, of course. My name is Darius Buhai, and I'm currently pursuing a Bachelor's degree in Computer Science at the University of Bucharest. While in high school, I've started learning how to create web applications out of curiosity, which made me enjoy coding. Even though my passion started with creating applications, I've recently discovered how useful data-structures and algorithms are.

Interviewer: Thank you for that, could you tell me what made you choose this position?

Applicant: I would say that my qualifications are appropriate for this job because I love implementing fast algorithms in the stock market.

Interviewer: Speaking off, what exactly do you know about our company? Can you please briefly describe what we do?

Applicant: I have read a lot about your company, and I can say that you are involved in developing fast algorithms for the stock market. Also, I've seen that you have a news channel.

Interviewer: Knowing that the stock market is always fluctuating, do you think you will be able to work under pressure? Can you tell me about an event where you've proven that you could work under pressure?

Applicant: Yes, I am sure that I can. During a hackathon last year, me and my team developed an entire application in under 24 hours.

Interviewer: Impressive. Do you have any questions before we continue to the next step?

Applicant: Yes, I have a few questions. First of all, how does a workday look like in your company?

Interviewer: As a Software Engineer, I can say that I have a flexible program, with lots of free time. Also, what I enjoy about working here is the fact that we can all enjoy ourselves at the end of the day by playing board-games.

Applicant: Wow, sounds awesome. Also, is it possible to change locations during an internship at your company?

Interviewer: Yes, you could always be relocated to one of our offices you ask so. This year alone, I've traveled to New York and Chicago. Are there any more questions or should we continue to the next step?

Applicant: No, this would be all. What is the next step?

Interviewer: The next step will involve reviewing your coding skills. For this, I will redirect you to my colleague, Jake.

Applicant: Thank you for this interview. I hope I'll be your colleague sometime soon.
